Habitat for Humanity home recipients, the Huerta family of Silverdale, Edwards, Ligia and Ed Hughes, and Carlton Dixon.

Lawrence Rome at Camden Catholic High School was honored with the Home For Heroes Volunteer Award."

Dr. John Nau, 57, of Trum-

doing charity work throughout our community.

CMIT Solutions has collective 6 of our top strategies for protecting your data and digital identity. Some can be implemented immediately, and others require more comprehensive

1. Make sure your software updates and security patches are complete automatically and regularly.

2. Construct a protective barrier of antivirus, anti-spyware, anti-virus and anti-theft security solutions around all of your devices and data.

3. Be careful with suspicious emails, opening pop-ups and “too good to be true” calls or offers.

4. Back up ALL of your data on a regular basis.

5. Use strong passwords, multiple-factor authentication, and consider an online password manager.

6. For businesses, develop and implement employee security practices.

More information on this can be found on our weekly tips blog at: https://www.cmitsolutions.com/weekly-tipblog/ 6-ways-protect-data-devices-digital-identity/

"Joey and I always try to help others who need our support and,” states Victoria, "it’s amazing how the littlest acts can make the biggest difference in someone’s life.

TECHNOLOGY CORNER Your Monthly Technology Tip

A list of people are asking lem of questions as a result of this month’s global ransomware attack. They want to know how they can protect themselves from such an incident or how they can enhance the security of their data and digital identities. People are more critical than ever, especially more than 20,000 computers in over 150 countries were infected with the WannaCry malware.

The hard truth is that no single security practice or strategy can provide comprehensive protection. That’s why a layered or multilayered approach is needed. A layered approach enables different solutions like proactive maintenance and monitoring, up-to-date anti-virus and anti-malware, password management, data encryption, up-to-date anti-virus and anti-malware, password management, data encryption, cybersecurity, and on line common sense to weave a tapestry of components that, when taken together, can provide strong security.
